### **Research areas and themes**

- My research part of a pluralistic approach that opens up economics to sociological and political science approaches. More specifically, my work lies at the intersection of the fields of development socioeconomics, network analysis, the political economy of institutional change and the sociology of public action. My research is structured around three main themes:

- ▶ Job quality and characterization of labor market vulnerabilities
- ▶ Embedding processes access to resources and stakeholder resilience
- ▶ The making of public policy through coordination relationships and the coherence of ideasrelational evaluation
