I.U.T. de Tarbes
Département G.E.A.

(🪧) Office (LEREPS) MD – 423 Manufacture des tabacs
Toulouse 31000 (France)

(🪧) Office (UTTOP) 4006 – Dept GEA
Tarbes 65000 (France)

Professional Positions

- **2024**–: Associate Professor at the Université de Technologie Tarbes Occitanie Pyrénées (UTTOP) and researcher at LEREPS EA 4212
  - ▶ Research affiliate at LADYSS UMR 7533
  - ▶ Research affiliate at LAM UMR 5115

- **2019–2024**: Associate Professor at Université Paris Cité and researcher at LADYSS UMR CNRS 7533

- **2019**: IRD Postdoctoral Researcher at UMI–SOURCES (formerly UMI–Résiliences) on the international PROTECT project (Madagascar)

Education

2018 PhD in Economics
Revisiting the Urban Labor Market in Latin America: Segmentation, Social Networks and Quality of Employment in Bogota – Université de Bordeaux (France)

2012 Master's Degree in Applied Economics, "Development Practices" – Université de Bordeaux (France)

2010 Bachelor's Degree in Economic and Social Administration – Université de Bordeaux (France)

Professional Experience (Consulting)

2022–23 External Consultant for RED Mangrove Development Advisors

- Development of a monitoring/evaluation tool for job quality on employment-integration programs run by the European Institute for Cooperation and Development (IECD)

2021–23 External Consultant for UNICEF Niger

- Political economy study of public action in Niger: *"Relational evaluation of the governance network of the national food crisis prevention and management system"* (see research projects [P4])

Collective and Elected University Duties

2025– Elected member (College B) of the IUT Council (constituent unit), UTTOP

2025– Member of the LEREPS EA 4212 Laboratory Council

2025– Member of the Research Operational Committee (COPER) – Research Directorate, UTTOP

2025– Member of ArIUT (Faculty College) – Regional Association of IUTs – Occitanie-Pyrénées

2023–24 Elected member (College B) of the GHES Faculty Council, Université Paris Cité

2020–23 Co-coordinator of Research Strand 1, LADYSS UMR 7533 – 2019–2023 scientific project

- Cross-cutting theme 1: *Inequality and territorial injustice: renewing the approaches*

Participation in Assistant Professor (MCF) Recruitment Committees

Participation in ATER/MAST Selection Committees

2026 Chair of the ATER Selection Committee (section 71), UTTOP

Member of the MAST Selection Committee (sections 01 to 06 and 27), UTTOP

Evaluation of RIPEC C3 Applications

2024 External evaluator for Université Paris X Nanterre – EconomiX UMR 7235

Evaluation of Doctoral Contract Applications

2024 External evaluator for a 2024-2027 doctoral contract proposed by the Institut des Amériques

Teaching Responsibilities

2024–26 Liaison officer for high-level (SHN) and national-pool (BNN) athletes, BUT GEA, UTTOP

- Rugby: Section Paloise (2 players), Stado Tarbes Pyrénées (4 players), Stade Bagnérais (1 player)
- Wrestling: Tarbes (1 athlete)
- Open-water swimming: Tarbes (1 swimmer)

2024 Head of Studies, 3rd year of the BUT GEA, GEA Department – UTTOP

2020–24 Head of Studies, 3rd year of the Bachelor's in Economics, Economic and Social Sciences (SES) track, and MIASHS Economics track, GHES Faculty and Mathematics Faculty

2020–24 In charge of the local PARCOURSUP algorithm and member of the application review committee for the Bachelor's in Economics, SES track, GHES Faculty

2020–24 Member of the M1/M2 Economic Policy Analysis admissions committee, GHES Faculty

2019–24 Participation in admission interviews for the M1 work-study program in Research and Consulting Professions, "IT Projects and Corporate Strategy" track, GHES Faculty

Master's Supervision and Thesis Co-supervision (Economics)

Doctoral Supervision

2026– ED 327 "Time - Space - Societies - Cultures" *(forthcoming)*

- ▶ Recruitment in progress – NUTTEO Impulsion | Emergence Occitanie Region doctoral grant (COALITICS) 2026-2026, Université de Technologie Tarbes Occitanie Pyrénées (LEREPS)
  Thesis co-supervised with Thierry Coudert (LGP – UTTOP)

  "*Systematizing ideational integration in the analysis of public policy-making in Africa: three essays on the articulation between structural and semantic approaches*"

2023– Authorization to Supervise Doctoral Research (ADT/HDR-equivalent): ED 624 "Sciences des Sociétés"

- ▶ Juliette Schlegel – doctoral grant 2023-2026 (ED 624), Université Paris Cité (LADYSS)
  Thesis co-supervised with Alain Piveteau (LAM UMR 5115 – Sciences Po Bordeaux)

  "*Relational evaluation of public policies: three essays in the political economy of development*"

  Young Author Award, Interdisciplinary Francophone Network Analysis Conference in Geneva – FROGNET 2026

  2026 Excellence Grant funding a 4th year of doctoral research – LIEPP | Sciences Po Paris | IDeX Paris Cité

Individual Thesis Monitoring Committee

2026– Member of the individual thesis monitoring committee (CSI): Elisa Cavaillon, Université de Bordeaux (Bordeaux School of Economics – CIFRE at Tanalah Monitoring)

"*Measuring and promoting job quality: a multidimensional and contextualized approach for decent work*"

2025– Member of the individual thesis monitoring committee (CSI): Elea Golliet-Mercier, INRAE/INP (AGIR)

"*Digital employment platforms and recruitment institutions in the agricultural sector*"

2021–24 Member of the individual thesis monitoring committee (CSI): Jorge Nuñez, Université Paris Cité (LADYSS)

"*Liberal capitalism and environmental institutional arrangements in Latin America: a comparative analysis of Mexico and Colombia*"

Thesis Committees and Dissertation Supervision

- ▷ M1 and M2 dissertations, work-study program in Research and Consulting Professions, "IT Projects and Corporate Strategy" track (supervision and defense, 2019-2024)

- ▷ M1 and M2 dissertations, Economic Policy Analysis, "Economics, Organizations and Society" track (supervision and defense, 2019-2024)

▷ Internship/study reports (L3 Economics, SES track, 2020-2024)

▷ M2 dissertations, EPOG+ Erasmus Mundus – International Consortium (supervision and defense, 2020-2024)

- ► Andjela Perovic (co-supervised with Nicolas Bédu, Université de Montpellier)
- ► Xinmiao Zhang: PhD candidate at Erasmus University Rotterdam (Netherlands) since 2023
- ► Lorena Cuellar (co-supervised with Nancy Folbre – Amherst University and Martina Sproll – IPE Berlin)
- ► Mariana Pellegrini: PhD candidate at Universidad Nacional de Mar del Plata (Argentina) since 2022

Teaching Activities

Doctoral Seminar

▷ Correlation and causality in the humanities and social sciences (10h lectures) – course taught at doctoral school 624 "Sciences des Sociétés" (2020–2023)

Research Areas and Themes

▷ My research follows a pluralist approach that opens economics up to sociological and political science perspectives. My work lies at the intersection of the socio-economics of development, network analysis, the political economy of institutional change, and the sociology of public action. Three main strands structure my research:

► Job quality and the characterization of vulnerabilities in labor markets

I am interested in the notion of job quality, which makes it possible to study, at different scales, the *continuum* of vulnerabilities in forms of employment beyond the usual typologies and oppositions used in developing countries (formality/informality or entrepreneurship/wage employment). In several of my studies, which draw on both a theoretical proposition [A5] and an empirical analysis of the local labor market in Bogota, Colombia [A5, A8], the interdisciplinary concept of job quality is put forward to capture the full complexity of labor market institutions and to assess the qualitative deficits faced by workers. Starting from a rather micro-socioeconomic approach, this work has since developed into a unified research program [A3] that now extends in three directions. First, from a more macroscopic perspective linked to the variety-of-capitalism and regulation-theory literatures, this concept of job quality helps characterize the variety of forms of "emergence" through

the heterogeneity of employment regimes in developing countries [A10, CO2]. More recently, through the international French-Argentine DIGITALECO project [P1], which I coordinate, my work adopts a more meso-socioeconomic approach, using job quality as a lens on the intersectional inequalities (social, gender-based, and geographic) produced by the sectoral regulation of the digital economy in Argentina and France. Finally, through an action-research project, "vivre le travail autrement" [living work differently], carried out in France within the social and solidarity economy and worker cooperatives [P7], I explore the "transformative" potential of social organizations in improving job quality for cooperative members.

► **Embeddedness processes enabling access to resources and actors' resilience**

Having observed the diversity of vulnerabilities within the social relations of work and highlighted the institutional deficits of social protection in developing countries, my work examines the practices that enable actors to build resilience and secure resources in these contexts. Drawing on the concept of embeddedness in socio-economics, my work aims to shed light on the social logics that shape individual behavior and the opportunities available. Using Granovetter's approach in economic sociology together with personal ("ego-centered") network analysis tools, I offer an empirical analysis of the effect of interpersonal mediation mechanisms on access to employment in Bogota [A7], using a semi-parametric finite mixture model that is original to this field and synthesized in a methodological article [A9]. This work highlights the ambiguity involved in identifying the effects of personal relationships (family, friends, or acquaintances) that maintain and stabilize labor market inequalities. Building on this, a further study generalizes these findings by linking types of ties to the problems encountered in labor markets in developing contexts. I thus propose linking the use of weak ties to solving an information-access problem regarding employment, and the use of strong ties to a possible solution to an asymmetry problem – a theoretical proposition empirically verified through econometric analysis combined with qualitative material [RE2]. In the southern regions of Madagascar, as part of the PROTECT project [P9], my work also addresses this notion of embeddedness as applied to access to informal social protection mechanisms in the absence of a generalized national system. The concept of local social protection systems is used to capture the full complexity of this socio-relational embeddedness of micro-protections. Using (bimodal) personal network analysis, this work shows that actors build their resource security – in other words, their survival – within a system of obligations and reciprocities that is both beneficial and constraining, arising from personal relationships, social organizations, or both [A2, RA4]. However, whether in relation to access to employment or to security, one type of relationship raises particular questions: the family. It is at once an essential safety net – often the last resort available – and a powerful generator of social obligations that are difficult to escape. One of my recent studies confirms this paradox of the family from a structural standpoint by examining the effect of solidarity between parents and children on employment mobility across 55 countries [WP1]. Finally, the embeddedness of individual practices is not only socio-relational but can also take a socio-technical form, when mediation mechanisms are no longer concrete relationships but instead operate through ICTs (mobile phones, smartphones, platform applications). At the heart of my current work on the MPEIS-COV project [P6], I focus specifically on the effects on entrepreneurs' practices and uses of this technical dimension of connecting actors. This work examines in particular the effects of ICT use on the resilience capacity and diversity of practices among informal micro-entrepreneurs in Dakar, Senegal, during the COVID-19 crisis, comparing the situation before and after the crisis [RA2].

► **The making of public policy through coordination relationships and the coherence of ideas: relational evaluation**

Given the importance of the institutional deficits identified above as an explanatory factor for the vulnerabilities and resilience practices studied, my work finally turns to understanding processes of institutional change in developing countries. Moving away from a macroeconomic approach, this transformation is examined through the evaluation of policy-making, understood as the object of political work within an arena involving a multiplicity of actors. Drawing on the cases of social protection policy reform in Madagascar [P9], the evolution of the national food-crisis prevention and management system in Niger [P4], and the reorientation of programs under the CARITAS-MEAE-AFD partnership agreement around a just ecological transition [P3], this work examines governance in the construction of public action and the form of the multi-actor political compromise underlying the design of public policies and programs that are crucial in the field of development. While it is well established that different actors never act alone in this kind of political process, observing the coalitions that form

within coordination networks (through the exchange of resources such as collaboration or information-sharing) is essential to understanding which actors occupy a central position enabling them to steer policy-making in progress and to assess its degree of effectiveness. But which actor coalitions are involved, how are they structured, and what ideas about public policy do they carry, in a context where the economic and institutional conditions for implementation do not appear to be met (a "failing" state, declining economic capacity, a labor market structure marked by informality)? To address these questions, my work uses "complete" social network analysis within the policy arenas presented above, drawing on policy network approaches and Sabatier and Weible's advocacy coalition framework from political science. The resulting evaluations reveal the importance of adopting an effective and robust method for identifying groups of actors (clusters) within coordination networks – something that is not yet the case in this emerging political science literature [A3]. Beyond this methodological contribution, my work also shows how coordination relationships are shaped by relations of influence and power between groups of actors – often conflictual power dynamics that are also expressed in the realm of ideas [CO1]. Finally, the shift from a group of actors coordinating around resources to a genuine political coalition capable of acting is not straightforward and necessarily requires internal coherence around ideas at several levels: on "deep core" political visions, on the precise objectives assigned to public policy in the sector concerned, and, finally, on implementation instruments. This layering of levels within the field of ideas and actor groups helps capture the formation of political coalitions, the power they hold, and the role they play in problem formulation, solution identification, and policy implementation [RA4; RE1]. Finally, how can a policy-making process advance or become resilient when coalitions clash within a decision-making arena? On this question, my work provides some elements of response and understanding by identifying "super" policy brokers – both in the resource domain and at the ideational level – who, contrary to the literature, are not all capable of resolving oppositions between blocs [RE3].

Work in Progress

(TC1) Social network analysis and development economics: an opportunity for pluralist perspectives? (with Jean-Philippe Berrou, Quentin Chapus and Alain Piveteau)

(TC2) The transformation of the French financial system: the elite network of general finance inspectors in action (with Nicolas Bédu and Caroline Granier)

Research Projects: Leadership, Participation, Evaluation

As Principal Investigator and Project Leader

(P1) **DIGITALECO 2024–2025**: "Intersectional and inter-regional employment inequalities in the digital economy in Argentina and France"

▷ Funding: Global Research Institute of Paris – IDEX (13,500 euros)

▷ Partnership: project carried out in collaboration with Universidad Nacional de Mar del Plata (Argentina)

▷ Field sites: Buenos Aires and Mar del Plata (Argentina), Paris and Bordeaux (France)

▷ Main research themes:

- Characterize and identify the determinants of social and gender inequalities produced by the growing digitalization of local labor markets in Argentina and France
- Establish a comparative typology of job quality in the platform economy sector in both countries
- Analyze and compare the national policy arenas regulating labor relations linked to the digital sector in France and Argentina

(P2) **REDES 2016–2018**: "Social Network effects in Latin American's labor market (Bogota): Mixed data recollection and analysis"

▷ Funding: ECOS-Nord 2016 international cooperation program – C16H01 with co-funding from Sciences Po Bordeaux and Universidad de Los Andes (60,000 euros)

▷ Partnership: scientific collaboration with Universidad de Los Andes and technical partnership with Colombia's National Statistics Department (DANE)

▷ Field site: Bogota (Colombia)

▷ Main research themes:

- Collection of original, representative data on interpersonal networks for job access in Bogota, based on a household administrative survey (GEIH 2016)
- Collection of original dynamic qualitative data on personal networks: how do social networks help workers in their professional lives?

As a Member of the Project Research Team

(P3) **GEMDEV-CPP-CARITAS 2021–2025**: Multi-year Partnership Agreement (CPP) CARITAS-MEAE-AFD to strengthen the capacities of vulnerable communities and the NGO's partners so as to build their agency; it also aims to build a shared vision and promote a just ecological transition (JET) across the territories involved

▷ Project leader: Alain Piveteau (IRD, LAM)

▷ Funding: CARITAS France and MEAE-AFD on behalf of GEMDEV (120,000 euros)

▷ Partnership: Secours Catholique-Caritas France NGO and 23 field partners across four regions (Africa, Latin America, Eastern Asia-Europe, Middle East)

▷ Field site: France, venues of the Stakeholder Assemblies: Dourdan (2022) and Lourdes (2024)

▷ Main research themes:

- Full network analysis: understanding the structure and governance dynamics of the CPP's inter-organizational coordination network (between CARITAS France and its 23 partners)
- Block modelling and community detection: identifying central actor coalitions in the coordination network and dominant idea blocs on the Just Ecological Transition, wave after wave
- Feedback with stakeholders: an action-research process through the dissemination of results to actors and new data collection to capture possible shifts in the coordination and idea network blocs, enabling (or not) the structuring of a shared vision of the JET among partners

(P4) **IRD-UNICEF-DNPGCA 2021–2024**: Governance network analysis of the National Food Crisis Prevention and Management System in Niger (DNPGCA – Office of the Prime Minister, Niger), identifying actor coalitions in terms of collaboration and ideational frameworks to enable better coordination of the food security sector in Niger.

▷ Project leader: Alain Piveteau (IRD, LAM)

▷ Funding: UNICEF Niger (90,000 euros)

▷ Partners: LAM Unit at Sciences Po Bordeaux, Université Abdou Moumouni de Niamey, UNICEF Niger, DNPGCA Permanent Secretariat in Niger

▷ Field site: Niamey (Niger, institutional actors participating in the DNPGCA system)

▷ Main research themes:

- Full network analysis: understanding the governance structure of the DNPGCA's inter-organizational coordination network in Niger
- Block modelling and community detection: identifying central actor coalitions in the coordination network and dominant idea blocs within the DNPGCA

(P5) **DISRAC 2022–2024**: Discontinuity of employment and unemployment insurance reform: what effects on income and return to work for jobseekers? Based on MIDAS data

▷ Project leader: Sabina Issehnane (Université Paris Cité, LIED)

▷ Funding: DARES (82,000 euros)

▷ Partners: EconomiX (Université Nanterre), CEET (CNAM), DARES, INSEE, UNEDIC, Pôle Emploi (for the production of MIDAS data)

▷ Field site: France (micro administrative data, CASD)

▷ Main research themes:

- Typology of unemployed workers' career paths before and after the reference daily wage (SJR) reform (optimal matching)
- Impact of the insurance reform introduced in October 2021 on discontinuous career paths (methods: simulation and difference-in-differences modelling)

(P6) **MPEIS-COV 2021–2023**: Orange-LAM (3rd wave) Senegal's informal micro and small enterprises facing Covid-19: digital uses in the crisis

▷ Project leader: Jean-Philippe Berrou (Sciences Po Bordeaux, LAM)

▷ Funding: Orange Sense Lab (50,000 euros)

▷ Partners: Sciences Po Bordeaux (LAM), Orange Sense Lab

▷ Field site: Dakar (Senegal)

▷ Main research themes:

- Analysis of the role of digital technological devices (mobile phones and smartphones) in resource mobilization for informal entrepreneurs in urban Senegal facing the COVID crisis
- Following up in 2021 with entrepreneurs already surveyed twice since 2016, to collect mixed data (quantitative and qualitative) on resources mobilized through digital technological devices in order to sustain activity during the health crisis

(P7) **Action Research – Vivre le travail autrement 2022**: Survey on the working and living conditions of members of business and employment cooperatives (CAE)

▷ Project leader: Céline Pochon and Samuel Michalon (Manufacture Coopérative)

▷ Funding: Fédération des CAE (10,000 euros)

▷ Partners: Manufacture Coopérative (MANUCOOP)

▷ Field site: France

▷ Main research themes:

- Relationship to time and job quality within CAEs, based on mixed data
- The plurality of gender inequalities within CAEs
- Popular education tools: facilitation with Céline Pochon (Manucoop) of the "Stat-live" workshop using the Radiant package at the Bigres gathering. Sète, August 24, 2022

(P8) **OPTIQUE 2019–2023**: Longitudinal survey on economics students' OPinion of economic PolICIes

▷ Project leader: Sophie Massin (Université de Lille, LEM and CES)

▷ Funding: Université d'Artois (1,500 euros)

▷ Partners: Université d'Artois, Université de Lille, Université de Rennes 2, Université de Montpellier, Université de Paris 1, Université Côte d'Azur, Université du Littoral Côte d'Opale

▷ Field site: France

▷ Main research themes:

- Analysis of the relationship between the Covid-19 crisis and changes in economics students' attitudes toward interventionism (perception of public intervention)
- Analysis of the relationship between the type of teaching received and economics students' political views

(P9) **PROTECT 2019–2022**: Social protection in Madagascar: institutional change and innovative forms of social protection

▷ Project leader: Claire Gondard-Delcroix (Université de Bordeaux, BSE)

▷ Funding: IdEX Bordeaux, Région Nouvelle Aquitaine, World Bank and AFD (270,000 euros)

▷ Partners: GREThA - CNRS and Université de Bordeaux, UMI Résiliences - IRD, CERED, University of Antananarivo, Catholic University of Madagascar

▷ Field site: Madagascar

▷ Main research themes:

- Understanding the structure and governance of the inter-organizational policy network during the process of redefining the national social protection strategy in Madagascar
- Mapping local systems and community strategies for social protection in vulnerable regions of southern Madagascar

Scientific Evaluation of Research Projects

2026 4th call for proposals of the research hub – theme "Technological developments and anthropological challenges" – Université Catholique de l'Ouest (UCO)
